Children, Dogs and Education Mary Renck Jalongo,2018-05-08 This book brings together authoritative information about the child dog bond as it is manifested with family dogs visiting therapy dogs and service dogs trained to assist children with disabilities Despite the widely accepted view that participating in a dog s care and interacting with dogs in behaviorally healthy ways is a route to becoming responsible and compassionate research on this complex dynamic is difficult to design time consuming to collect and challenging to analyze This volume synthesizes theory research and practice bringing all to bear upon child dog interactions in homes schools libraries and the community at large Children Dogs and Education serves as a handbook for a diverse group of adults who seek to build positive relationships between children and dogs parents families professional dog trainers teachers librarians mental health professionals health care professionals and university faculty The study of interactions between human and nonhuman animals has captured the imagination of an international community of researchers from many different fields and professions Even though dogs are ubiquitous in the lives of most children studies of children s interactions with dogs in families and communities are lacking Most of the previous research on the human canine bond has focused on adolescents and adults or even when younger children are the focus it has tended to rely on parents to speak for children There are three features of this book that make it unique First it goes beyond exploring the child dog bond to examine additional important issues including children s concepts of responsible care their ability to interpret dogs behavioral cues and their ideas about canine behavioral issues training Second unlike most other work to date it represents children s voices through cases interviews and drawings Finally the contributors to this edited work use their collective wisdom to draw educational implications and suggest direction in preparing the next generation of dog guardians

Access to Veterinary Care Michael J. Blackwell,Christy L. Hoffman,Terry G. Spencer,Kathleen Makolinski,Rachael Kreisler,2022-11-23

Summary of Ari Whitten's The Ultimate Guide To Red Light Therapy Everest Media,2022-03-20T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The human body needs light to be healthy The human body needs different types of light to function well and these light types are crucial for our health We have developed a light deficiency and toxicities that are having a massive impact on our health 2 The most common light related health problems are vitamin D deficiency and circadian rhythm disruption which are caused by inadequate and improper light exposure Red and near infrared light deficiency is also a problem and has widespread effects on our brain and organ function immune system energy levels mood neurotransmitter balance and hormone levels 3 We are designed to need light to be healthy but since we spend almost all our time indoors we are massively deficient in sun exposure which causes major problems for our health Red and near infrared light are able to penetrate deep into the body and cells and have healing effects on the cells 4 Red and near infrared light are not some weird technology that benefits us for some random reason These wavelengths of light come from the sun and it turns out that our body has evolved over millions of years to be capable of utilizing them to help power up our cells
